Governor Mark Parkinson
Kansas Statehouse
Topeka, KS

The Honorable Mark Parkinson:

It is with pleasure that the Kansas State ICC (Interagency Coordinating Council) also known as the Kansas Coordinating Council on Early Childhood Developmental Services (CCECDS) distributes these two annual reports: covering the time from July 1, 2007 to June 30, 2008 and from July 1, 2008 until June 30, 2009.

Although I am relatively new to the Chair position (October, 2009), my volunteer service as a public member of the Kansas ICC includes the two years included in these annual reports.

As a council, we continue to work collaboratively with state agency personnel to meaningfully implement the task of providing “advice and assistance” as stated in federal law (34CFR Part 303.651), and state statute (KSA 74-7802 Sub h). The Council takes very seriously its statutory charge to “recommend policies, procedures, and legislation for effectively providing health, education, and social services” (KSA 74-7802 Sub f). Furthermore, the council's time and efforts remained dedicated to our mission of ensuring that a comprehensive service delivery system of integrated services is available in Kansas to all children with or at risk of developmental delays from birth through age five and their families.

In these times of tight budgets, the Kansas ICC has eliminated its only administrative staff support position. Our Coordinator now takes care of all our logistical needs while continuing the day-to-day tasks of providing advise and assistance between and among the members of the ICC, agency administrators and most importantly the direct service providers and the families of the children working throughout the state of Kansas to enhance the lives of Kansas's young children. We are also making good use of technology to conduct many of our meetings electronically, and re-visiting the frequency of our full Council meetings.

If we can be of any further assistance to you or your staff, please do not hesitate to ask.

Thank you for all that you do on behalf of our Kansas children and families.

Respectfully submitted,

Eva Horn, PhD
ICC Chair

ANNUAL REPORT: July 1, 2007 – June 30, 2008

Kansas Interagency Coordinating Council on Early Childhood Developmental Services

The mission of the Kansas Coordinating Council on Early Childhood Developmental Services is to ensure that a comprehensive service delivery system of integrated services is available in Kansas to all children with or at risk for developmental delays from birth through age 5 and their families.

INTRODUCTION

The Kansas Interagency Coordinating Council is based in both federal law and state statute. We serve as an advisory body with most of our members appointed by the Governor. Our area of focus concerns children with disabilities (or developmental delays) aged birth through five years and their families.

Advise/Assist in Implementing State Regulations for IDEA	March 1, 2008	Partnerships Committee

ACTIVITIES

Our activities include, for the most part (but are not limited to): providing information regarding budgets and the creation of policy by testifying in the state legislature, clarifying uncertainties by requesting information from agencies, responding to and providing assistance to local communities when requested, and advising/assisting the Governor and state agencies as they implement public policy. We also provide information to enhance ongoing collaboration among state agencies and our local partners. We monitor activity in the Statehouse and share that information with stakeholders across the state. Participation with other formal and informal groups helps to assure that all children, including those with delays and disabilities, are a part of all ongoing service program development activities and advocacy efforts.

The Kansas ICC, as a whole, conducts its business in monthly meetings. The Executive Committee meets monthly to assure all matters are taken care of in a timely manner, as well as to prepare for each meeting of the full Council. Additional work is accomplished by standing committees. During this year the Kansas ICC had three standing committees: Funding, Advocacy, and Partnerships.

During this past year, 7,009 children aged birth to three years and their families received services by *tiny-k* (Part C) networks and 9,608 children aged three through five were served by Part B of IDEA school districts, cooperatives, and interlocals.

HIGHLIGHTS

A list of specific accomplishments for Fiscal Year 2008 would include:

- A letter was sent to the entire Kansas Congressional delegation expressing concern around proposed changes in the administration of the Medicaid program. The proposed changes would have adversely affected school districts and other providers of services under the Medicaid program. Subsequent to that written communication and other advocacy efforts, these changes were rescinded by the Obama administration.
- As a result of the efforts of the Kansas ICC and many other partners, the 2008 Kansas Legislature increased the state appropriation/funding for Part C by one million dollars for FY 2009
- Another highly successful parent advocacy training was conducted in conjunction with several collaborative partners on October 19-20, 2007, with 130 parents benefiting from the basic tutorial in policy-making, and how best to influence it.
- The Kansas ICC worked to advise and assist KDHE with its State Performance Plan for Part C of IDEA. Particular attention was given to the data surrounding outcomes.
- The Kansas ICC worked collaboratively with SRS and other stakeholders in monitoring the implementation of the new Medicaid waiver for young children with Autism Spectrum Disorder.
- Another highly successful *tiny-k* Day “Under the Dome” advocacy event was conducted on 3/12/2008. Over two-thirds of the Kansas legislators received a personal visit from one of over three dozen constituents who informed him/her of the importance of Part C services and the need for more state funding.
- A Kansas ICC informative brochure was created.
